

California Company Launches Program to Enable Gifting of Urgently Needed PPE to Frontline Health Workers Online

TitanProtectUSA 'Gift PPE' Program Sets Target of 20 Million Masks Gifted to Healthcare and Essential Workers Fighting COVID-19

CAMARILLO, Calif. July 28, 2020 -- Today, Titan Protect USA, a venture of Titan West Trading, LLC, announced a program to stimulate and enable individuals and businesses to secure NIOSH certified N95 masks and other critical PPE supplies and to gift these supplies to frontline and essential medical and healthcare providers and first responders. In addition to selling integrity-priced PPE for individuals and businesses, Titan Protect USA has committed to helping everyone contribute to providing PPE to those who are helping to treat and protect others and who cannot afford or do not have access to the PPE they need.

Due to the extreme rise in COVID-19 cases and hospitalizations, [Titan Protect USA](#) created an online portal where individuals and businesses can acquire these critically-needed supplies for essential frontline providers who are facing shortages of supplies and are unable to afford the personal protective equipment they need.

The [Gift PPE program](#) is available at the [Titan Protect USA website](#), and allows those who wish to make a contribution to local and national efforts to combat the pandemic as safely as possible, to select various PPE supplies, including N95 particulate respirator masks which are reserved for sale only to essential and frontline entities, and to direct these supplies to a frontline entity of their choosing.

The Company has listed nearly 4,000 entities, as well as providing the capability for giftors to enter an essential facility as their intended recipient. Frontline and essential providers and entities can also request to be added as recipients of PPE by [contacting Titan Protect USA](#). Titan Protect USA handles all aspects of shipping and handling to the gifted recipient.

Daniel Sooferian, founder of Titan Protect USA, said: "With millions of units currently in stock in the US, we are able to quickly facilitate delivery of these essential PPE supplies to those who need it most, and need it right now. We encourage everyone to pitch in and help protect the lives of those who are helping to save the lives of others. If we all do our part, even a little, we can get through this more quickly."

The Gift PPE Program is intended to facilitate access to PPE supplies for hospitals, medical offices, nursing homes, clinics, dental facilities, first responders and others. The Company promises that all supplies will be shipped immediately from Camarillo, CA to the selected recipients.

Sooferian added: "We need every available healthcare and medical worker, essential services provider and frontline facility working at full capacity to handle the spike in infections and hospitalizations we are seeing. By providing PPE to these facilities and professionals at no cost to them we believe we can make a difference. The PPE supplies and equipment we provide are fairly priced, and we stand against price gouging in any form."

According to the latest information available, as of the date of this writing, there are over 4 million confirmed COVID-19 cases, and nearly 150,000 deaths in the United States alone. Several health experts are predicting the potential to reach 1 million new cases a day.
